

## RTC Library Search Tips: E-books from SAGE Publishing

SAGE Publishing is a major academic publisher which started in New York, and also has an office in New Delhi, and a few other cities outside the USA. Thanks to Research4Life, a non-profit organization helping to close the information gap in developing countries, we have access to nearly 5,000 e-books from SAGE.

These books are in a diverse range of subjects. Looking at subjects offered at RTC, some are covered better than others (there are significantly less titles in humanities, for instance), but to help demonstrate the scope available, I've listed and linked one book for each program offered at RTC at the end of the newsletter.

There are several ways to search. Perhaps the simplest is to go to this URL:

[http://login.research4life.org/tacsgr0sk\\_sagepub\\_com/](http://login.research4life.org/tacsgr0sk_sagepub_com/)

and then log in using any of the user name – password pairs in this document:

[https://cloud.rtc.bt/index.php/apps/files/?dir=/\(RTC\)%20Library%20PUBLIC/Access%20instructions%20for%20databases&fileid=69882#pdfviewer](https://cloud.rtc.bt/index.php/apps/files/?dir=/(RTC)%20Library%20PUBLIC/Access%20instructions%20for%20databases&fileid=69882#pdfviewer)

The only problem with this method is that sometimes you will encounter books that we don't have access too. However, after you enter keywords into the search box, you can filter results on the next screen, which shows results. On the right side of the screen, check the box that says 'Content available to me'. This is highlighted in the screenshot below:

One further note about this screenshot (which shows a general search for 'Bhutan'): SAGE doesn't seem to have books that are focused solely on Bhutan, so here the results page shows

book chapters, also with a link to the full book that the chapter appears in (e.g. Found in: *Health Care Systems Around the World...*).
